

Second Judicial District Court Pretrial Detention Outcome Sample (February 2020)

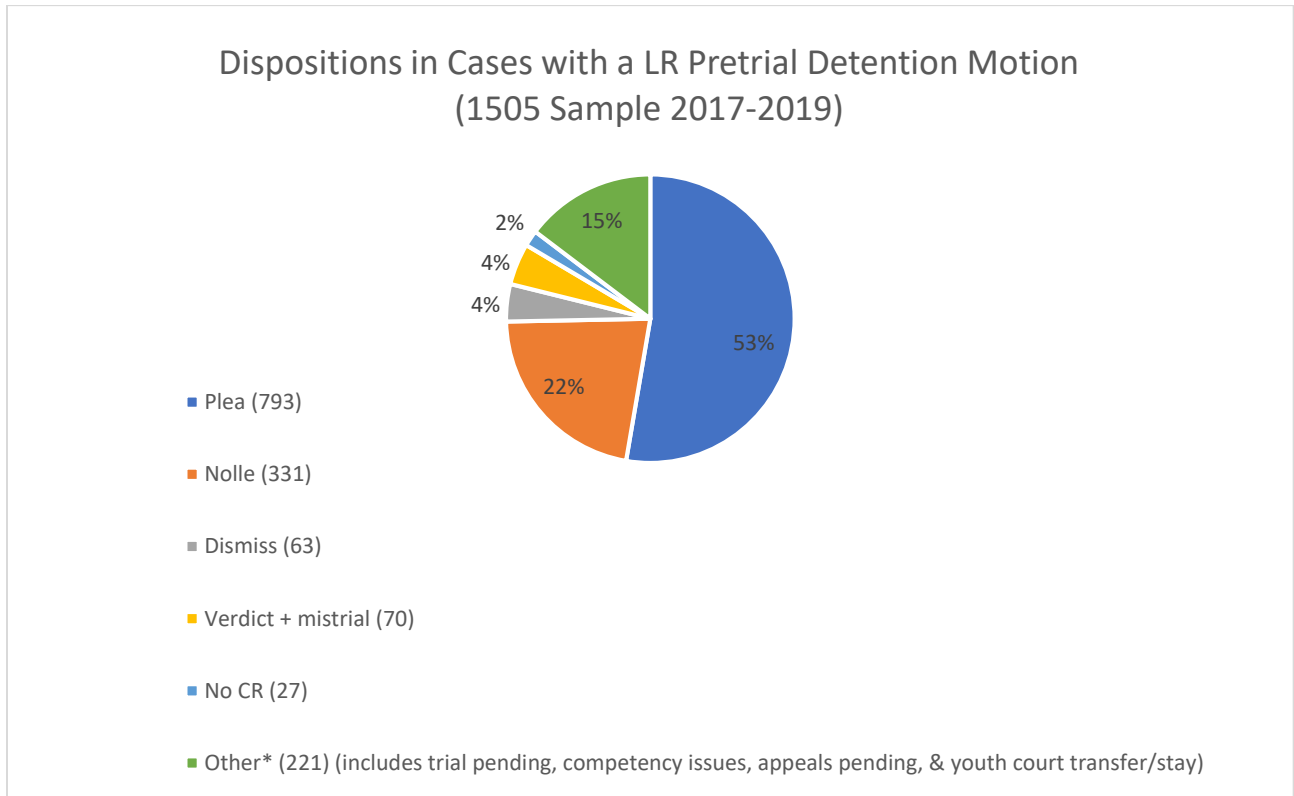

Data sample includes:

- 1505 cases filed between 2017-2019 (sample size is approximately 50% of total cases filed over that time period)
- Cases selected from the filing of a LR case (pretrial detention motions initiated by filing a LR in District Court)
- This data arose out of a project in the Second Judicial District Court in which the primary purpose was to identify open LR cases that had already been resolved in some manner, often awaiting consolidation with a CR case and ensure those LR cases were properly closed. Therefore, first cases selected those where there was a LR cases that remained open on September 26, 2019, the date of the data pull. All of those cases are included in this sample. We then went back and began looking at cases that were closed as of December 5, 2019, that had not been in the earlier sample, continuing until the data deadline for the adhoc pretrial committee.

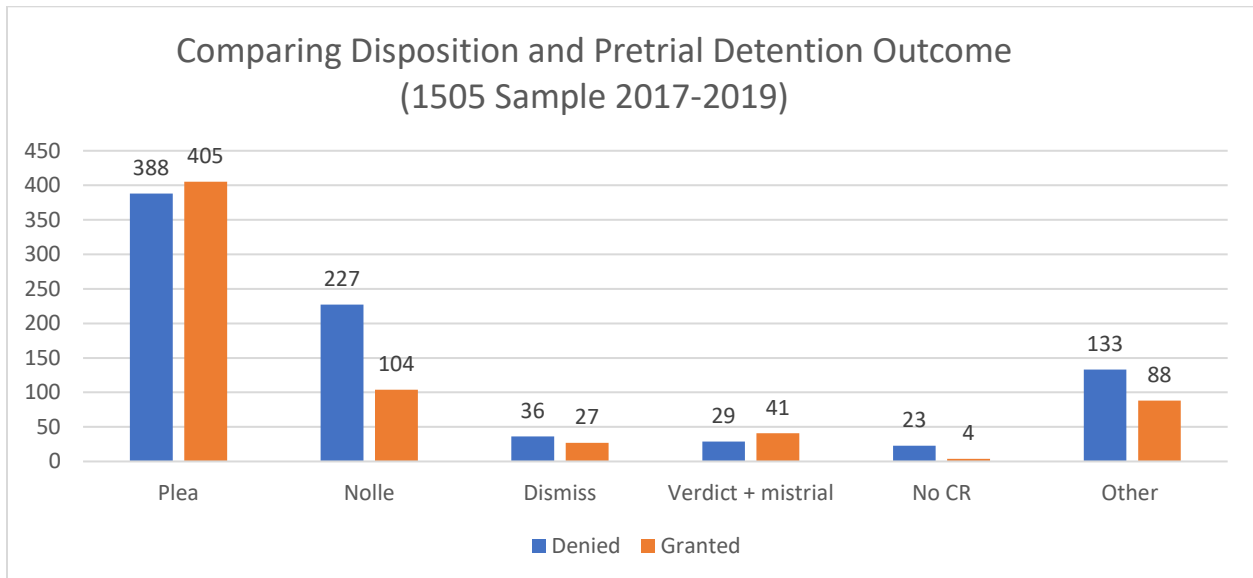

Pretrial Detention Motion Outcome:

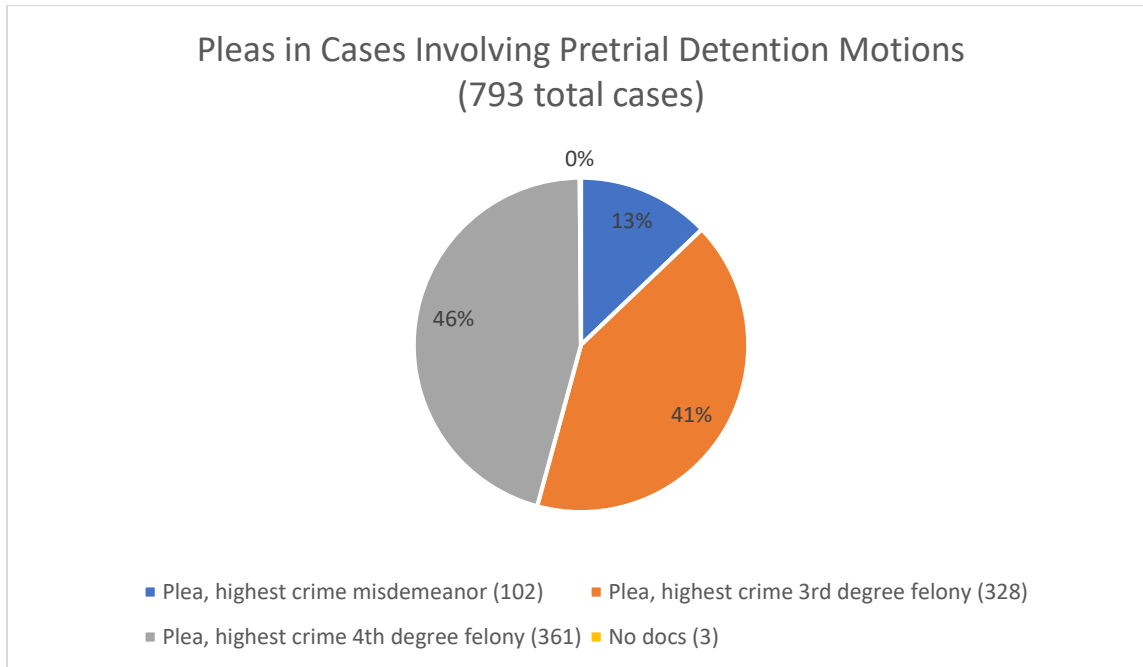

Disposition/Status of Case at the time of docket review:

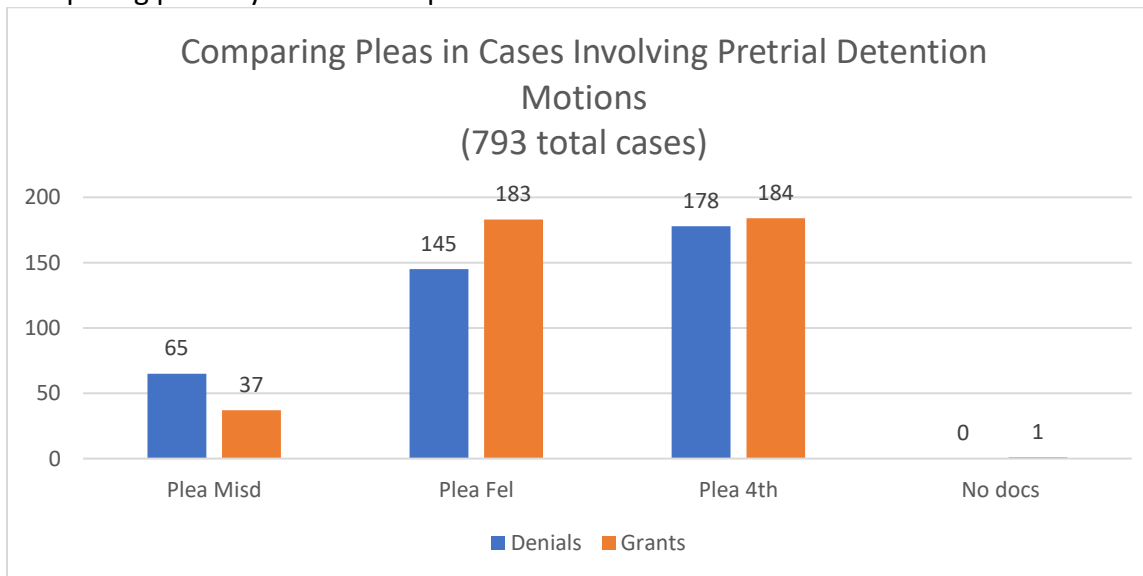

Comparing case disposition and pretrial detention outcomes:

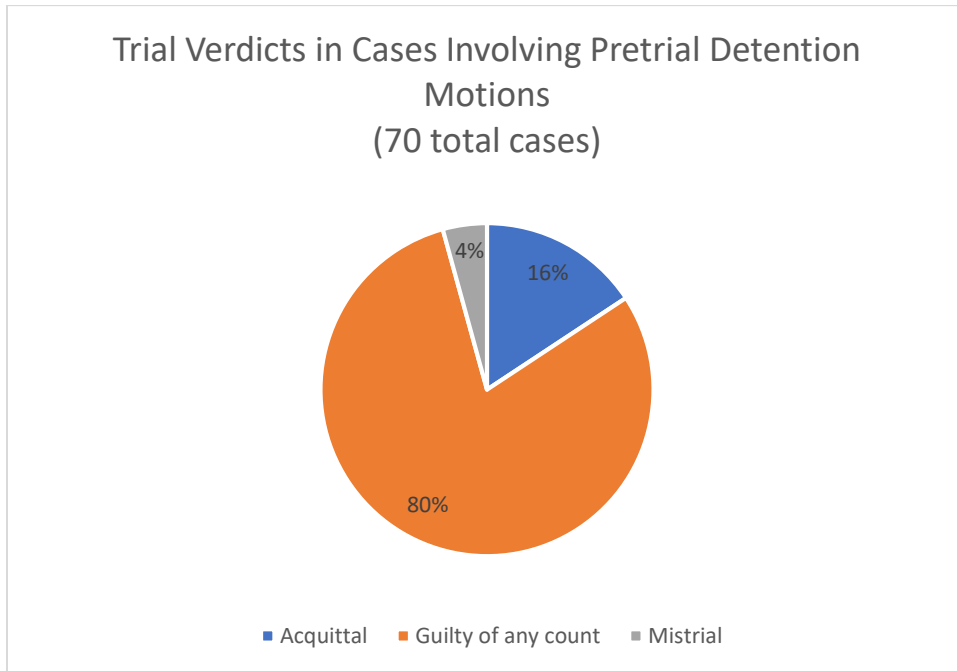

Breakdown of pleas in sample (by highest charge convicted):

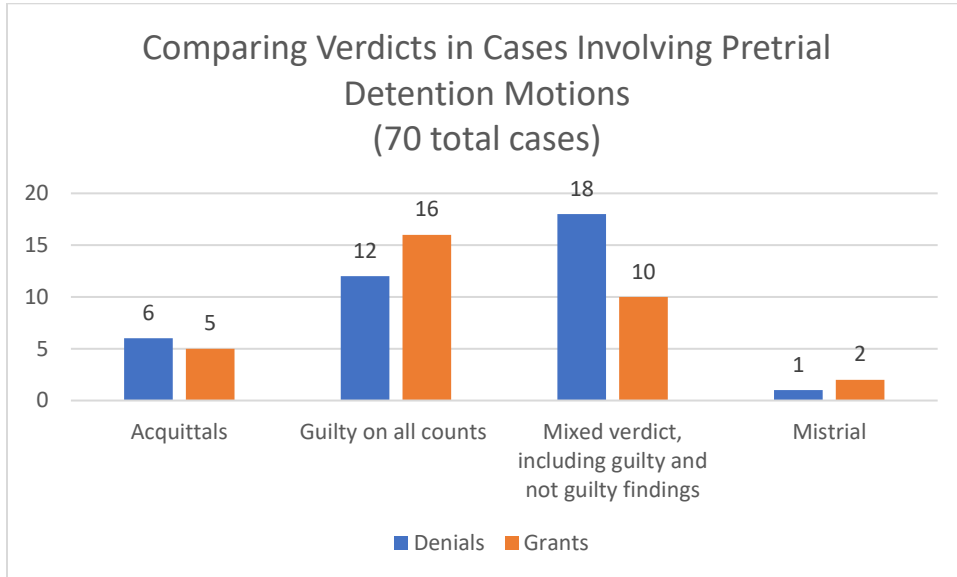

Comparing pleas by outcome of pretrial detention motion:

Breakdown of trial verdicts in cases with a LR detention motion filed:

Comparing trial verdict by outcome of pretrial detention motion:

One other statistic from the sample of 1505 cases involves appeals:

- Only 29 cases (or 2%) of the cases were appealed on the issue of pretrial detention out of the 1505 case sample.
 - 22 of the 29 appeals were appeals filed by the defendant; 7 of the appeals were filed by the State.
